Hurricane JEANNE Storm Surge QUICKLOOK

Tides Online -- Center for Operational Oceanographic Products and Services

Surge Analysis Time
26 September 2004
0000 EDT

NOAA/NOS CO-OPS

Summary: Water level stations on Eastern Florida Coast recording rising surges from ~0.75 foot above normal at Virginia Key to 3.0 feet above normal at Trident Pier and Fernandina Beach. Surges remain from 1.0-1.5 feet along Georgia and southern South Carolina coastlines. Barometric pressures beginning to rise again in South Carolina and Georgia , still dropping in Florida as Hurricane Jeanne makes landfall. Additional stations will be monitored as storm surge activity appears.
