ENGINEERING BULLETIN

Bulletin Number: 07-002   Date: May 21, 2007

Engineering Change:

Adding a Login to the Xperts for DPAS data recovery

System: Xpert, XDark and 9210 Data Collection Platforms

Originator: Warren Krug   warren.krug@noaa.gov

Approved by MSCB on May 21, 2007

This bulletin describes the procedure of adding a login to the Xpert so DPAS can log on to the station and recover missing data.

Use Xterm to log on to the system as Super, go to the Main Menu, click on the Setup tag

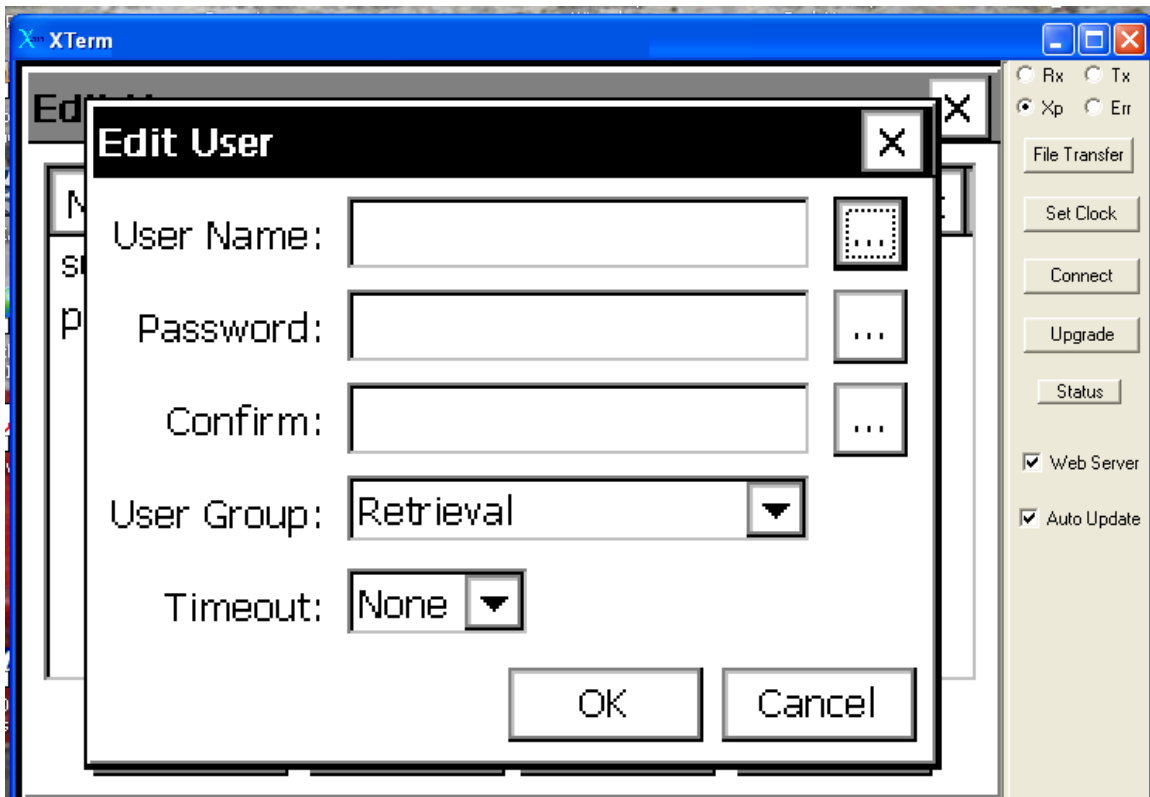

On the Setup menu, Use the down arrow bar so that User appears
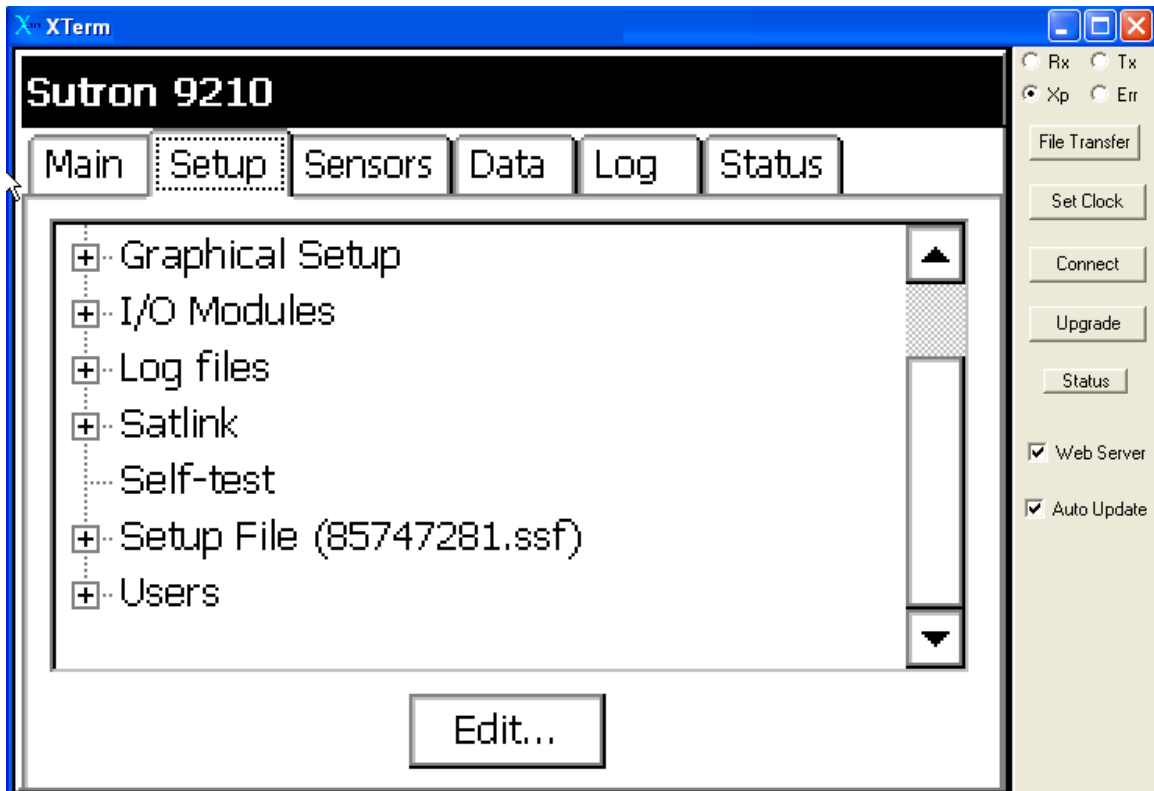

Highlight User, click on the EDIT box
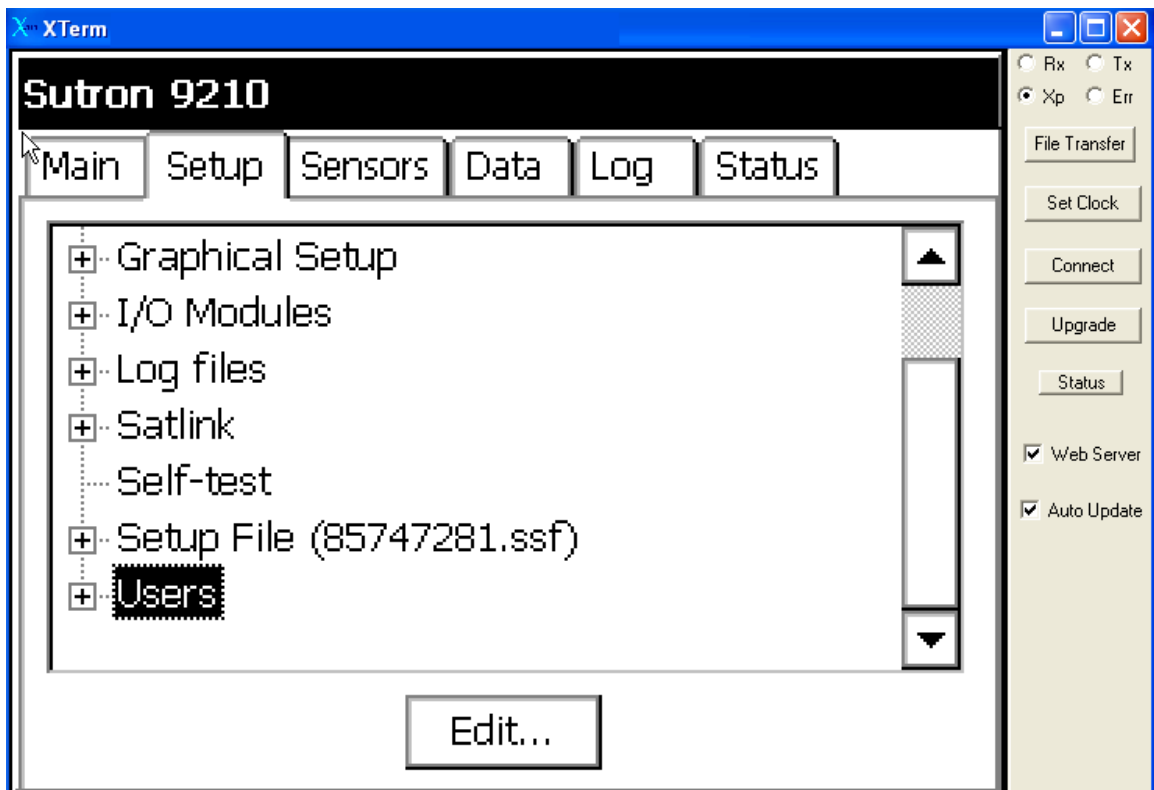

You will now see the Edit box for Users

In the User Name: block   type in a username

In the Password: block   type in a password   the system will show a * for each letter you type

In the Confirm: block type in the same password   the system will show a * for each letter you type

In the User Group: block, use the pull down arrow and select   Retrieval

In the Timeout: block, use the pull down arrow and select   60 min
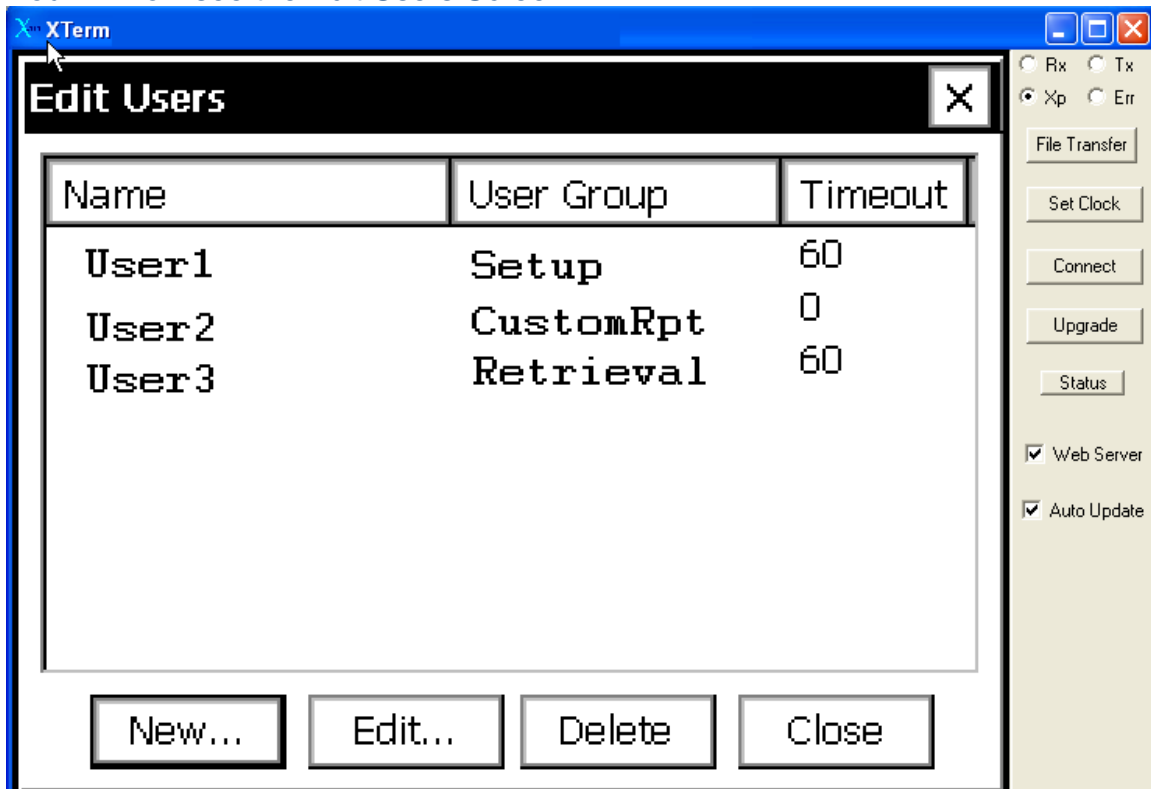

The screen should look like this

Edit User   ✕

User Name:	User3	...
Password:	****	...
Confirm:	****	...
User Group:	Retrieval ▼	
Timeout:	60 mi ▼	

OK   Cancel

Press OK to complete the process.

You will now see the Edit Users Screen

XTerm   _ □ ✕

Edit Users   ✕

Name	User Group	Timeout
User1	Setup	60
User2	CustomRpt	0
User3	Retrieval	60
